ABSTRACT

The present invention is directed to a band for curing a human body, which comprises a flexible sheet member coated with an adhesive on a surface thereof, silver attached to the surface of the sheet member coated with the adhesive, and at least one optical fiber. According to the present invention, the pain, wound or the like can be spontaneously remedied using micro current and light waves such as far infrared rays produced from acupuncture spots, trigger points and around affected parts of the human body. Further, one can easily cure themselves using the band because the band has no side effects and can be simply operated.
